CT-700 Series

DS3 Baluns

Features/Advantages	Description	Applications
 Transport DS3 signals over Category 5 UTP Easy installation Requires no power source Uses existing wiring plant Lifetime warranty Made in USA 100% tested 	The ETS CT-700 Series of DS3 Baluns allows distribution of DS3 signals over Category 5 or better cabling, instead of having to pull dedicated coax. The baluns convert the unbalanced 75Ω signal to a well-balanced 100Ω for low loss transport over UTP, minimizing both signal radiation and noise pickup. The design also minimizes reflections caused by poor impedance matching. The CT700 DS3 Baluns use only a single pair out of a run of four pair.	ISP and ASP SitesBackbone Distribution
